

Chapter 0: Introduction

Time: ¼ Hour

After completing Chapter 0 you will understand the objectives for the WICED Bluetooth 101 (WBT101) Class. You should be able to explain the learning objectives, agenda, scope of the class, and format of the lab manual.

0.1	PREREQUISITES	1
0.2	SCOPE	1
0.3	AGENDA	2

0.1 Prerequisites

Solid fundamentals in C-Programming (data types, operators, expressions, control flow, functions, program structure, pointers and arrays, data structures, multi-file module programming).

Some experience with standard MCU concepts and peripherals (Serial communication, PWMs, ADCs).

0.2 Scope

What this class is:

- A survey of the Cypress Bluetooth Ecosystem (Chips, Modules, ModusToolbox IDE, BT_20819A1 Software Development Kit (SDK), Forum etc.)
- A survey of using the BT_20819A1 SDK to create Bluetooth devices by connecting common MCU I/O peripherals to an external Bluetooth client (e.g. a smartphone)
- An introduction to Bluetooth Low Energy (BLE)
- An introduction to Classic Bluetooth (Basic Rate and Extended Data Rate)
- An introduction to Bluetooth Mesh

What this class is not:

- A discussion/debate of what WICED or ModusToolbox should be.
- A C-programming primer.
- A detailed examination of Bluetooth or RF Parameters.
- An introduction to Wi-Fi.
- An introduction to ZigBee.
- A discussion of Linux integrated WICED.
- A discussion of how to pick the correct Bluetooth module or device
- A detailed examination of MCU peripherals.
